

Certificate of Security Achievement

This certifies that:

Luis Antonio De Jesús Prada Maldonado

has completed the Path:

Secure Development Fundamentals: Mitigating Common Software Vulnerabilities

This learning path, derived from assessment results, targets key secure development gaps—covering supply chain risks, authorization failures, path traversal, insecure design, deserialization, and integer overflows to strengthen practical application security skills.

Path Duration:
36 minutes

Completed On:
June 15, 2026

Certificate No: 001034-002402
