Certificate of Security Achievement

SECURITY JOURNEY

This certifies that:

Yushun Wang

has completed the Path:

AI Augmented Development

AI Augmented Development describes any part of the Software Development Lifecycle that leverages AI tooling. Developers are using AI to help them create, write, test, and deploy code. This course covers Vibe Coding, AI agents, and Model Context Protocol (MCP) systems. Through focused, hands-on lessons, learners will understand how AI can integrate into everyday development workflows to build faster, more intelligent, and more efficient systems.

Path Duration:
1 hour, 15 minutes

Completed On:
August 02, 2026

Certificate No: 001084-000015
