

Certificate of Security Achievement

This certifies that:

Gabriel Sauer

has completed the Path:

HackEDU: DevSecOps

DevSecOps (Development, Security and Operations) is a practice of application security (AppSec) to introduce security earlier into the software development life cycle (also known as "shifting security left"). The DevSecOps course will instruct you on foundational concepts and practical exercises encouraging integrated security thinking. Developers, Security engineers, and Operations (including DevOps) would benefit from this course.

Path Duration:
3 hours, 45 minutes

Completed On:
February 13, 2026

Certificate No: 000207-005259
