

Certificate of Security Achievement

This certifies that:

Josef Ungerman

has completed the Path:

LLM Security

This course is essential for securing applications using Large Language Models (LLMs). It provides foundational understanding of Gen-AI and LLM concepts, including architecture and common uses. It focuses on critical security risks using the OWASP LLM Top 10. You'll learn to identify, prevent, and mitigate threats like Prompt Injection, Insecure Output Handling, and Supply Chain vulnerabilities. The goal is to prepare you to design, deploy, and operate LLM-powered applications securely.

Path Duration:
3 hours, 9 minutes

Completed On:
February 18, 2026

Certificate No: 000816-002038
